

Shrink or Extend Partitions with EASEUS Partition Manager 3.0 Server Edition without Data Loss

NEW YORK, N.Y., Dec. 9 (SEND2PRESS NEWSWIRE) – EASEUS Software, the innovative and dedicated hard disk management solution provider, today announces partition management software to shrink or extend partitions without data loss provided in EASEUS Partition Manager 3.0 Server Edition. It is addressing the needs of corporate IT administrators to maximize server computer performances.

Data is totally untouched when shrinking or extending a partition, which is in great need of IT administrators to extend system partition. No data loss in all operations ensures the server data safety. Unallocated space is needed to extend the system partition. Shrink a volume nearby and redistribute the unallocated space to extend the system partition.

EASEUS Partition Manager Server Edition can also create, delete, format, hide/unhide, copy partitions in Windows 2000/2003/2008 (32/64 bit) and it also works in DOS. This new Server Edition adds disk copy, partition copy to clone anything on server to another disk or partition and get a cloned one. The copy functions are designed for upgrading larger hard disk and data security.

With 1.5TB, RAID, fast file-by-file copy supported, EASEUS Partition Manager can handle up to 32 hard disks and works with different file types. The most outstanding feature is its ability to shrink and extend partitions, live, without erasing them or losing any data; administrative rights are required for use.

Pricing and Availability

Starting at \$149, EASEUS Partition Manager 3.0 Server is available directly from EASEUS' Website at partition-tool.com/easeus-partition-manager-server/ or by contacting sales@easeus.com.
