

EaseUS Windows Server Partition Software: The Right Server Partition Tool for IT Admins

NEW YORK, N.Y., Jan. 27 (SEND2PRESS NEWSWIRE) – EASEUS Software, the leading hard disk management solution provider, announced its upgraded version of Windows Server partition software. EASEUS Partition Manager 3.0 Server Edition – claimed as a “PartitionMagic(TM) alternative” – was designed for security and stability. EASEUS Partition Manager 3.0 Server Edition allows corporate IT administrators to resize or move partitions on Windows Server without data loss, and much more.

Unlike other common Windows Server partition software, EASEUS Partition Manager 3.0 Server Edition is a comprehensive server partition solution for Windows Server 2000/2003/2008 and Windows 2000/XP/Vista, allowing you to Resize and Move, Copy and Create, Delete and Format, Hide and Unhide server and non-server partitions. These functions make EASEUS Partition Manager 3.0 Server Edition the ideal Windows Server partition software for all IT administrators.

Features

EASEUS Partition Manager 3.0 Server Edition focuses on the following advanced server partition management:

- * Resize and Move partitions without losing data.
- * Disk Copy or Partition Copy Wizards to backup data in case of any unexpected accident.
- * Supports hardware RAID.
- * Creates a bootable CD/DVD to manage partitions when system is not bootable.
- * Preview any partition task before completing it.
- * Change cluster size automatically and manually.
- * Supports hard disks from 2 GB to 1.5 TB.

Moreover, with its user-friendly interface, this server partition software's functions are all easy to use. So if your computer is a server, try EASEUS Partition Manger 3.0 Server Edition to manage your critical partitioning needs.

System requirements: Microsoft Windows(R) Server 2000/2003/2008 (32/64 bit); 2000/XP/Vista (32/64 bit).
