

Manage Server Partitions with Partition Magic Alternative – EASEUS Partition Manager Server

NEW YORK, N.Y., Feb. 6 (SEND2PRESS NEWSWIRE) – EASEUS Software, a leading hard disk management solution provider, today announces its release of the upgraded version of EASEUS Partition Manager 3.0 Server Edition with the aim of helping enterprise users manage – and especially resize – server partitions without data loss. Unlike PartitionMagic(TM) that fails to support Windows servers, EASEUS Partition Manager 3.0 Server Edition provides comprehensive functions to optimize the usage of server partitions.

EASEUS Partition Manager 3.0 Server Edition is compatible with Windows Server 2000/2003/2008 and Non-Server 2000/XP/Vista 32 and 64 bit systems. Hardware RAID is also supported. So the excellent compatibility can well meet the needs of enterprise users when managing their server partitions or a non-server partition.

Both basic and advanced server and non-server partition features are allowed under EASEUS Partition Manager 3.0 Server Edition. The basic features include: create, format, delete partition by using a friendly disk map in an easy way, resize/move partition without data loss, hide/unhide partition, set active partition, etc. Additionally, advanced server and non-server partition features are also available, such as creating a bootable CD/DVD to manage Windows Server partitions when there is a boot failure caused by virus or any other unexpected occurrence. And Hard Disk Copy/Partition Copy Wizards can help back-up and protect data via copy function.

To conclude, as an excellent PartitionMagic alternative in the server management field, EASEUS Partition Manager 3.0 Server Edition is the best value software to manage server partitions for IT administrators. FYI, EASEUS Partition Manager 3.0 Server Edition is single-licensed, meaning it can be used on one computer only. EASEUS Software also offers EASEUS Partition Manager 3.0 Unlimited Edition which can be used on multiple machines within the whole company.
