CyberTouch|AV Announces 19-inch Rack Mount Touch Screen Monitor

NEWBURY PARK, Calif., Feb. 20 (SEND2PRESS NEWSWIRE) — CyberTouch|AV is pleased to announce the introduction of ER1900 — the latest addition to CyberTouch|AV's line of touch screen LCD monitors. Available now, The ER1900 is a professional-grade 19.0-inch integrated touch screen LCD monitor designed specifically for 19-inch rack mount applications. It utilizes a 19.0-inch wide screen diagonal color TFT LCD as display and a resistive touch screen as the input device. Touch screen communication to CPU is RS232 or USB. The ER1900 is ideal for any application that uses racks. The wide-screen aspect ratio allows display of more information while reducing the number of screens and increasing interactive efficiency.

Incorporating a reliable and durable 8-wire resistive touch screen, the ER1900's touch surface is protected by a chemical and abrasion resistant polycarbonate overlay. ER1900 responds to the touch of a finger, stylus or a gloved-hand. The ER1900 interacts with most software applications after installation of driver software. ER1900 utilizes an NEC Multisync (model number LCD195WXM) with 1440×900.

The ER1900 is compatible with Crestron, AMX, Pioneer DVD-V8000, Boeckeler Pointmaker and is also available with on-board Apple Mac mini or mini PC. For more information about ER1900 please visit: cybertouch.com/er1900x.html
