

# Make Your System Partition Large Enough to Install Windows 7 Beta

NEW YORK, N.Y., March 5 (SEND2PRESS NEWSWIRE) – EASEUS Software today announced its latest version of partition management freeware: EASEUS Partition Master (formerly EASEUS Partition Manager) 3.0.2 Home Edition which can perfectly help computer users to resize their current system partitions if they want to try Windows 7 Beta. EASEUS Partition Master enables computer users to resize and move partitions without data loss. It also works well with a virtual machine.

As the next release of Microsoft Windows, Windows 7 has drawn much attention even though it is still in testing phase and lots of Windows fans can't wait to try it out. Installing Windows 7 Beta alongside other Operating System for a dual boot system seems to be a trend. And the first step is to resize the current System Partition.

Easy operation and data security are the key factors that computer users are most concerned about when resizing their System Partitions. To fulfill the aim of EASEUS group to make life easy, EASEUS Partition Master is designed for simple operation. And the most attractive feature is that all the data is completely protected during the resizing process. Besides resizing and moving partitions, EASEUS Partition Master also provides a wide range of other functions, including: Copy/Disk Partition, Hide/Unhide partitions, Create, Delete and Format partitions, etc.

To conclude, EASEUS Partition Master is a nice choice for Windows users to resize their System Partitions to install Windows 7. This freeware works perfectly with hardware RAID and Windows 2000/XP/Vista (32 bit). For 64 bit, please try EASEUS Partition Master Professional Edition.
