As a result of the increasing demands of resizing system partition, especially enlarging a system partition for server users, many new partition software solutions are springing up now. So choosing the right partition software to resize system partitions is important.

EASEUS Partition Master 3.0.2 Server Edition is one of the leading partition software solutions which allows server users to resize a system partition without destroying any data.

With EASEUS Partition Master Server Edition, the resized partition on Windows Server can be previewed before being applied to the hard disk, and all data is completely protected during all operations.
