

Momentum Transport Announces Release of Dealer Transport Management System

HOUSTON, Texas, April 3 (SEND2PRESS NEWSWIRE) – Momentum Transport, the Automobile Industry's transportation leader, announces the release of the Dealer Transport Management System (DTMS). Momentum's proprietary online vehicle transportation tracking system both automates and simplifies [vehicle transportation](#) – for auto dealers and car carriers alike.

Momentum's new web-based solution provides dealers access to thousands of auto carriers specializing in auto auction pickups and dealer-to-dealer trades, as well as the ability to receive instant quotes and provide full transactional reporting. The DTMS saves auto dealers, auctions, manufacturers, and exporters time and money by transforming a paper, fax and phone based procedure into a streamlined, automated process.

Momentum's managed transportation solution provides online visibility with consistent email alerts from the time an order is placed until the vehicle(s) are delivered. Dealers can both track progress and have a transport history of each vehicle – including costs and purchase order (PO) numbers. This process saves dealers from having to issue checks to the carrier at delivery, which translates to a seamless close out and simplified integration with their respective accounting department.

Dealers can log on to the site at any time – from any location – and have immediate access to the status of each car transport. Momentum Transport's [Dealer Accounts division](#) is backed by an experienced transport staff that follows a very stringent process, verifying licensing and insurance for each vehicle – minimizing dealer liability.

"Momentum Transport has helped me streamline my online auction buying process. Not only am I saving money on transport, but vehicles are getting to my dealership 30 percent faster and I don't have to worry about the small details. Finally, I can spend time managing rather than dealing with accounting and transport headaches," commented Hector Cardet, Preowned Manager, McGinnis Cadillac.

Momentum's Dealer Transport Tracking System has no sign up or monthly fees and allows the dealer to eliminate the hassle of COD payments by carriers at delivery. "With online auctions and dealer trades becoming the trend, dealers have the ability to transport one car at a time, rather than grouping on a

full truckload. As a result, we have seen an increased demand for our Managed Transportation Solution services,” said Baylor Fortmeyer, Director of [Auto Transport Dealer Services](#).

About Momentum Transport

Since 1996, Momentum Transport has been the nation’s premier provider of auto transport services. Momentum’s goal to provide value-priced, hassle-free transport services has helped to vault the company to one of the largest and most well respected transport providers in the country.
