

Taycor's Free Equipment Financing Calculator Shows Businesses How a \$30,000 Item Can Be Acquired for Only \$1,300 Up Front

LOS ANGELES, Calif., Apr. 13 (SEND2PRESS NEWSWIRE) – “Many business owners don't realize that they can get the equipment they need for very little cash out of pocket,” says Bob Skibinski, CEO of Taycor Financial. “We've created a free online equipment financing calculator that shows you exactly what your monthly payments are going to be as well as the return on investment you'll see by putting the new equipment to work in your business.”

What's unique about Taycor's [equipment lease calculator](#) is that it also shows business owners the Section 179 tax deduction they can take when they lease equipment rather than buying.

“You've got to include your tax savings into the overall cost when you think about leasing. It's a huge benefit,” says Skibinski.

Incredibly easy to use, Taycor's calculator also shows businesses the Return on Investment they can expect by putting the equipment to use in their business.

“We spent a lot of time to make sure we have the best equipment financing calculator on the internet. It shows our clients the numbers up front, plain as day – and they love it.”

Companies can see their estimated monthly payment, and can choose the term, and the type of lease. The [equipment financing](#) calculator even shows the net-cost-per-day of having the equipment in your facility.

“We want to be totally up front about what we can do for our clients and make sure they know exactly what terms and what benefits to expect. Our goal is to show business owners real numbers and real choices so they can get funded as quickly as possible. The online calculator helps us do that.”
