

# QED Connect to Address Education Sector

MANCHESTER, N.H., April 13 (SEND2PRESS NEWSWIRE) – QED Connect, Inc. (OTC: QEDN / QEDN.pk), an innovative Software-as-a-Service (SaaS) provider for the information security market, today announced it will introduce an Educational Program with a special price structure to support those partners who sell into the education sector, making it easier for education organizations to comply with the Children’s Internet Protection Act 2000 (CIPA).

Send2Press® Newswire

CIPA addresses concerns about access to offensive content over the Internet on school and library computers. CIPA imposes requirements including internet safety policies and technology protection measures, Internet blocking and filtering for all computers accessed by minors on any school or library that receives funding support for Internet access or internal connections from the “E-rate” program.

While the Company continues to be adversely affected by the current economic conditions which have impacted adversely almost all companies in its sector, QED Management believes that this program will expand the Company’s market share by enhancing its portfolio of partner friendly products. Continued slowdowns could adversely affect the Company’s ability to increase revenues. The program will be available this summer to support the fall semester.

## **About QED Connect, Inc.**

QED Connect, Inc. is an [information security Software-as-a-Service \(SaaS\)](#) provider that gives organizations visibility, management and control of activity on all their computers, laptops and wireless devices. The company's SaaS, Omni Manager, is an affordable way to monitor and manage how employees are using company computers and the Internet any time, any location; solving problems created by today's "virtual" work environment (branch offices, remote workers, traveling employees).

Omni Manager is a web-hosted software application that includes Internet filtering and blocking, antivirus, instant messaging management, asset tracking, application usage monitoring and policy management. ROI is delivered by employee productivity gains, cost savings and improved operational efficiencies.
