

Announcing the Safest Solution to Partition RAID on Windows Server and Desktop

NEW YORK, N.Y., April 15 (SEND2PRESS NEWSWIRE) – EASEUS, the leading partition management solution provider, announces its latest release – EASEUS Partition Master 3.5 Server Edition, featuring improved partitioning RAID functionality. This innovative program is designed with improved technology to address the needs of IT administrators to partition RAID; easily partition RAID0, RAID1, RAID5 and RAID10 on both Windows Server and desktop without data loss.

“We’ve done great research based on our customers’ opinions and got to know their common needs to partition RAID, especially resizing RAID, while working with Windows Servers. Typical example is you might come across the situation that the system partition C: drive is run out of space on the created hardware RAID. Under this condition, the best solution is to resize the RAID partition rather than to recreate a RAID,” says Mr. Liu, the CEO of EASEUS. “Our latest version of EASEUS Partition Master Server Edition is the safest solution to resize RAID, with improved compatibility with hardware RAID.”

EASEUS Partition Master 3.5 Server Edition is compatible with Windows Server 2000/2003/2008 and desktop 2000/XP/Vista 32 and 64 bit systems. All types of hardware RAID are supported. This easy-to-use partition software provides both basic and advanced functions, including: Resize and Move partition, Copy partition, Copy disk, Format partition, etc. Besides enhanced technology to perfectly support hardware RAID, two new features are added in the latest EASEUS Partition Master 3.5 Server Edition: Convert partition and Explore partition.

To partition RAID on a single server computer without destroying data, EASEUS Partition Master 3.5 Server Edition is the safest and easiest solution. Furthermore, EASEUS Partition Master 3.5 Unlimited Edition is more cost-efficient for large enterprises allowing unlimited usage on all the servers and desktops within the entire company.
