UGI Monitors and Analyzes Networks with Colasoft's Network Analyzer Software

UGI, another business giant purchased Colasoft network analyzer software for their network monitoring and analyzing purposes.

READING, Pa. and Chengdu, China, May 7 (SEND2PRESS NEWSWIRE) — Colasoft, an innovative provider of network analyzer software for network monitoring and troubleshooting, recently announced that UGI, Inc, a natural gas and electric utility giant headquartered in Reading, Pennsylvania, has purchased Colasoft Network Analyzer – Capsa Enterprise Edition as their network monitoring and troubleshooting solution.

Send2Press® Newswire

Following giant customers like Airbus, IBM, Intel, Pepsi, Philips, UGI now becomes another of Colasoft's big customers. When talking about why UGI chose Colasoft among dozens of network analyzer providers, the IT executive from UGI said: "easy-to-use, good performance, Intuitive and detailed analysis report, Colasoft impressed very much … of course, competitive price is also another element why I chose (the) Colasoft product."

UGI will deploy Colasoft Network Analyzer to the whole company computer

network, to analyze network problems, detect network intrusion attempts, and gain information for effecting a network intrusion, monitor network usage, gather and report network statistics, filter suspect content from network traffic, etc, to keep their network safe and smooth.

Colasoft Capsa is a network analyzer (packet sniffer or protocol analyzer) designed for network monitoring and troubleshooting. It performs packet capturing, network monitoring, protocol analyzing, packet decoding, and automatic diagnosing. By giving users insights into all of network's operations, Capsa makes it easy to isolate and solve network problems, identify network bottleneck and bandwidth use, and detect network vulnerabilities.
