

Nextshore Helps Small and Medium Business with Technology Finance Offering

Nextshore's Website Financing Plan Helps Progressive Businesses get a leg up on the Competition

PALM BEACH, Fla., May 20 (SEND2PRESS NEWSWIRE) – Nextshore LLC, an emerging leader in global outsourcing, today announced its own business stimulus package – that helps its customers go for a land grab on the Internet – by providing financing for website development. Nextshore can now offer qualified customers 100 percent financing on its products and services. Additionally, all contracts executed before July 4th, 2009 will receive a 10 percent discount in celebration of the American entrepreneurial spirit.

“There are two types of businesses: proactive and reactive. Some are barely making it; others are doing better than ever. Why? Vision. Some are looking ahead, others behind,” said Christopher Terry, the Company President.

He continued, “Now is the time to go for it – this is market share at wholesale prices, I’ve never seen an opportunity like it. What could Nextshore do to help the visionaries? Very simple, bridge the cash crunch. Thus we arranged for a line of credit to help our progressive customers.”

The Nextshore financing program covers all development and software offerings including new websites and upgrades to existing ones; ecommerce/shopping cart solutions (osCommerce and Magento); Web Presences/SEO (search engine optimization) services; social media/web marketing campaigns; SugarCRM (customer resource management) hosted offerings; and Smoothwall Security products.

Program Outline: Credit lines from \$5-\$25K with 2-4 year pay offs, leases with \$1 buyout or traditional financing, very competitive interest/lease rates.

Requirements: 2 years in business and good credit. All clients must pass a credit review – financing not guaranteed. Personal guarantees are not acceptable for this offer.
