

Innovative Server Partition Manager Maximizes Server Performance and Minimizes Server Downtime

NEW YORK, N.Y., June 16 (SEND2PRESS NEWSWIRE) – Today, EASEUS released its upgraded version of EASEUS Partition Master 4.0.1 Server Edition, which provides innovative features to maximize server performance and minimize server downtime. EASEUS is a partition solution provider committed to delivering high quality and affordable partition management utilities. They have not disappointed Windows server users with their latest server partition manager, featuring new technology to extend the C drive which is NTFS without reboot, copy dynamic volume to basic disk and resize the basic disk, etc.

“We always take care of users’ needs in our software. No matter if you want to resize C drive to optimize server usage or copy disk to backup data when upgrading from a small hard disk to a larger one, EASEUS Partition Master Server Edition can do the trick without destroying data,” says Mr. Liu, CEO of EASEUS. “And in the latest version, we focus on two demands: most server users don’t want to reboot the computer after extending C drive; many of them need to partition a dynamic volume.”

Newly upgraded EASEUS Partition Master Server Edition can extend the C drive without reboot, which is the NTFS file system. This feature is designed for NTFS only since most system partitions (C drive) on servers are NTFS for its advantages over the FAT file system.

For those who need to partition a dynamic volume, the Dynamic Volume Copy Wizard built in to EASEUS Partition Master Server Edition provides step-by-step instructions to copy dynamic volume to unallocated space on a basic disk. Then, you can resize this basic disk or perform other repartition operations. This function is designed to partition the dynamic volume indirectly.

EASEUS Partition Master Server Edition is for single server users from small businesses. Large business users who have multiple servers can choose EASEUS Partition Master Enterprise Solution to enjoy flexible partition solutions.

Pricing and Availability

At only \$199, EASEUS Partition Master 4.0.1 Server Edition is available at
