M2SYS Technology to Offer Desktop Biometric Technology to Kronos Customers

ATLANTA, Ga., July 23 (SEND2PRESS NEWSWIRE) — M2SYS Technology, an award-winning biometric technology research and development firm, announced today that Kronos Incorporated, the global leader in workforce management solutions, has chosen M2SYS to provide its customers with a desktop biometrics solution that seamlessly interfaces with Kronos time and attendance applications. M2SYS' Bio-SnapON™ biometric software supports fingerprint and finger vein identification, enabling Kronos customers to record employee time data with a single finger scan.

Send2Press® Newswire

Kronos time and attendance applications work in tandem with Kronos data collection devices to help customers control labor costs, manage compliance risk, and improve workforce productivity. Bio-SnapON™ runs on a PC and authenticates employees with a USB biometric reader. Requiring a biometric scan eliminates "buddy punching," the act of one employee punching in for another, which can translate into substantial savings for employers.

"The M2SYS offering complements the Kronos 4500 Touch ID terminal, our existing biometric data collection terminal. The desktop biometric system is

ideal for Kronos customers who have a small number of employees spread across many locations, and in cases where a traditional biometric data collection device may not be practical," commented Steve Earl, Kronos director of product marketing.

The Bio-SnapON™ biometric software easily scales to support multi-site, networked implementations, and supports special requirements such as labor distribution and employee self-service. "With the establishment of this relationship with Kronos, M2SYS has cemented itself as the leading provider of biometric technology to the workforce management market," noted Michael Trader, president of M2SYS Technology. "We are delighted to provide our Bio-SnapON™ biometric software and USB biometric readers to current and prospective Kronos customers."

About M2SYS Technology

M2SYS Technology, www.m2sys.com, is a recognized industry leader in biometric identity management technology, delivering a wide range of customized, fully functional, turn-key fingerprint, finger vein, and other biometric software solutions for businesses and consumers.

About Kronos
