

# SecuGen Delivers New OptiMouse Plus Fingerprint Reader

SANTA CLARA, Calif., July 15 (SEND2PRESS NEWSWIRE) – SecuGen, the world's leading vendor of optical fingerprint readers, is pleased to announce that it has released the OptiMouse™ Plus, an upgraded version of the world's first combination fingerprint reader and optical mouse. Like all of SecuGen's fingerprint readers, the OptiMouse Plus is very rugged, accurate, and affordable.

Send2Press Newswire

The OptiMouse Plus scans fingerprints faster than the previous generation of fingerprint mouse and now features Smart Capture™. Smart Capture technology automatically adjusts the sensor brightness to insure accurate and high quality fingerprint scanning. Smart Capture greatly improves results when obtaining fingerprints from moist or dry fingers, which used to be problematic with earlier generations of fingerprint readers.

The OptiMouse Plus can be used with the countless applications that have been developed by SecuGen ISV partners. In addition, software developers can now download SecuGen Software Developer Kits (SDKs) at no cost. SecuGen's SDKs cover an increasingly wide variety of Operating System platforms.

Dan Riley, VP of Engineering for SecuGen said, "The OptiMouse Plus continues our endless pursuit in the development of fingerprint peripherals that are rugged, accurate, fast and affordable. This new product meets all of those targets."

"At SecuGen, we listen closely to what our partners are saying," added Won Lee, CEO of SecuGen. "We are confident that the new OptiMouse Plus is responsive to their needs. We continue to focus all of our efforts on providing our partners with the products they need to build highly competitive businesses."

## About SecuGen

SecuGen Corporation ([www.secugen.com](http://www.secugen.com)) is the world's leading provider of advanced, optical fingerprint recognition technology, products, tools and platforms for physical and information security. SecuGen designs and develops FBI-certified fingerprint readers and OEM components, developer kits and software, including NIST/MINEX-compliant algorithms. Known for high quality, ruggedness, and performance in a wide variety of applications and

environmental conditions, SecuGen products are used by world-leading financial, medical, government, educational and corporate institutions and are sold through a partner network of over 200 original equipment manufacturers, independent software vendors and system integrators around the world.

SecuGen® is a registered trademark of SecuGen Corporation in the United States and other countries.
