

No Crammed C Drive Worry, No Data Loss

NEW YORK, N.Y., July 15 (SEND2PRESS NEWSWIRE) – Are you still facing the problems that your PCs, laptops and servers' C drive are filled up with operating systems and procedures, and without enough space for use? Frustration often comes with a "Windows Low Disk Space" warning and slow-running condition. According to EASEUS' technical support department, most EASEUS Partition Master customers email to ask for the help of expanding their C drive to solve the problem of low disk space and slow speed.

The most expected methods are to expand C drive by taking the space of the adjacent drive, or extend system C drive by using the unallocated space. What is the easy and quick way to expand C drive with all the data protected?

EASEUS provides comprehensive hard disk partition tools and system optimization software: EASEUS Partition Master is designed especially for computer space usage optimization without data loss. With a useful and simple operation wizard, the main "resize and move" functions enable you to expand the C drive easily. It also allows users to operate on the disk map directly. In order to protect the valuable data, copy functions are also built-in to ensure data safety. The most attractive feature is its ability to extend C drive without rebooting Windows.

Working well with PCs, laptops, servers and Virtual Machines, EASEUS Partition Master really does a big favor to extend C drive, just as its customer feedback indicates: "I used it to expand the size of my C: partition on a windows 2003 Server using raid 5, each process went very smoothly, and it was just what I needed."

Pricing and Availability

Get a 20 percent discount on EASEUS Partition Master Professional Edition now, available at the price of \$31.96 directly from EASEUS Web site at www.partition-tool.com/professional.htm or by contacting sales@easeus.com.
