

# Grab Your Free Copy of Windows Backup Software to Protect Windows System

NEW YORK, N.Y., Aug. 19 (SEND2PRESS NEWSWIRE) – EASEUS, security and storage management software producer, launches its free backup software for Windows users – EASEUS Todo Backup – to back up an entire PC and Server for free, including the operating system plus your data, applications, settings and everything! The newly developed free Windows backup software is especially designed for system state backup and system disaster restore by bootable CD, which means users no longer have to worry about a system crash.

Compared with the backup function built-in to the Windows operating system itself, this free EASEUS backup software offers users some advanced features as follows: compress image files to save space; split image files to fit different storage devices; exclude page files and set password for image files to prevent illegal access to the backup image, etc. For Windows XP users, it is not possible to backup the system partition with the backup utility built-in to Windows itself, as it can only be used to backup data. EASEUS offers users the ability of saving and a reliable backup solution to secure the system in case of computer crash with this free Windows backup software.

This free Windows backup utility works with almost all the most popular operating systems including Windows 2000 Professional and Server/Advanced Server SP4, Windows Server 2003 (32 and 64 bit), Windows Server 2008 (32 and 64 bit), Windows XP (32 and 64 bit) and Windows Vista (32 and 64 bit).

With a friendly user interface, no matter when you need to create an image for the system, partition or disk, a restore or disk clone, backup and restore will be as easy and as automatic as possible with this free windows backup software. Download a copy of the free Windows backup software to protect data and the system now at: [www.todo-backup.com/download/](http://www.todo-backup.com/download/).

## Availability

EASEUS Todo Backup is totally free to use for both home and business users. It supports nearly all major Windows systems, like Windows 2000 professional/XP/Vista and Windows Server 2000/2003/2008. For more information visit: [www.todo-backup.com](http://www.todo-backup.com).
