

Treadmill Reviews Rate Compact LifeSpan Treadmill Best Treadmill

SALT LAKE CITY, Utah, Dec. 15 (SEND2PRESS NEWSWIRE) – The new compact LifeSpan TR200 folding treadmill, made by PCE Health and Fitness (www.LifeSpanFitness.com), was highly praised by treadmill review groups in recent reviews of the best treadmills for 2010. The compact TR200 folding treadmill received awards for Best New Treadmill, Recommended Unique Design, and Best Treadmill under \$1000.

The compact [LifeSpan TR200 treadmill](#) is designed for light use walking indoors in small workout spaces. “This category buster is a very compact treadmill that could be stored under something that has about 12 inch clearance,” says the leading consumer products testing group who selected the TR200 treadmill as a Recommended pick for its Unique Design. Treadmill Doctor also praised the compact LifeSpan TR200 treadmill as “One of the most innovative new treadmills in an industry that is lacking in regard to innovation.”

Finally, Fitness Professor says the TR200 folding treadmill is “Perfect for those looking for a simple, easy-to-use AND easy-to-store walking treadmill. Hands down the TR200 is our Head of the Class winner for treadmills under \$1,000!”

The LifeSpan TR200 folding treadmill is contemporary, convenient and sized perfectly for light users looking for a simple, portable walking treadmill. This compact folding treadmill is surprisingly sturdy, yet small enough to use in any workout space. It has features not found on similar treadmills such as incline to simulate uphill walking, contact heart rate sensors to monitor heart rate, and built-in speakers with premium sound for mp3 tunes. The intuitive console features a large, easy-to-use display with six exercise programs, motivating readouts and quick speed and incline buttons. All this plus it comes fully assembled and ready to use right out of the box.

The compact TR200 treadmill folds quickly and easily to store under a bed, in a closet or behind a door. Unlike most folding treadmills where the deck folds up, the TR200’s unique design allows the handlebars to fold down and lay flat on the treadmill deck, making it ideal to store vertically or horizontally at only 11 inches thin.

Bruce Pechman, independent fitness equipment reviewer, sums up the TR200 treadmill saying: “I love it! It has a rock solid frame and combines high-end treadmill features and attributes with the bonus of folding away quickly and easily.”
