

Syntec Optics Unveils Clean Room

PAVILION, N.Y., Jan. 5 (SEND2PRESS NEWSWIRE) – Syntec Optics, the largest independent manufacturer of custom polymer optics in North America, has unveiled a new clean room at its Pavilion, NY location. This Class 10,000 clean room will be used for assembly and testing of precision polymer and glass optical systems that are highly sensitive to environmental particulate. The construction and operation of a clean room represents Syntec's endless commitment to offering customers a broad range of technological solutions and innovations.

"Not only will the new clean room allow us to continue to deliver exceptional quality on current projects, we now have the capabilities to take on new projects that require the purest of production and testing processes. This is especially key for us as we continue to grow in the medical, biometrics, and defense industries where precision, superior function, and reliability are critical," said Lori Steffenilla, VP of Manufacturing Operations.

The latest in a long line of advancements, this clean room opens up further opportunities for Syntec to expand its customer base. The creation of a clean room in-house further strengthens the firm's position as a leading solutions provider with a complete range of contract manufacturing services including design, molding, diamond turning, assembly, metrology, and supply chain management.

"We are always looking for ways to improve and enhance both our processes and capabilities which allow us to continue to deliver the excellence that our customers have always expected from Syntec and more. The addition of clean room capabilities is another step in the process of continuous improvement that helps take Syntec to the next level," stated Rick Arndt, Vice President and General Manager.

About Syntec Optics:

[Syntec Optics](#) has been recognized by Frost and Sullivan as the industry leader in the polymer optics field. Syntec was the recipient of their prestigious 2008 North American Polymer Optics Growth Excellence of the Year Award. Syntec's commitments to quality, innovation, and customer satisfaction guarantee superior results that ensure project success.

Services are all "in-house" and include design, tooling, manufacturing, integrated assembly services with clean room capabilities, and full metrology. With hundreds of completed engagements, customers worldwide can rely on skilled teamwork for high performance, low cost solutions that ensure project success.
