

Trusty-Step International Introduces Virtually Undetectable Clear Acrylic Non-Slip Floor Coating

LYNN, Mass., Jan. 5 (SEND2PRESS NEWSWIRE) – Trusty-Step International (trusty-step.com), a trusted and established anti-slip floor treatment manufacturer, recently introduced its clear non-slip acrylic coating with crystal clear polycarbonate aggregate to its floor treatment line.

The company's new acrylic anti-slip floor treatment is virtually undetectable, with surfaces retaining an exceptionally durable, reflective, fade-resistant and non-yellowing high-gloss finish for up to three years before reapplication is advised. It is the first coating of its kind to ensure slip-resistant surfaces maintain the same visual appearance before and after treatment.

The company highly recommends its new clear acrylic coating product for use on vinyl, VCT, glass, metal and painted concrete. Many customers also elect to use the new coating on glossy marble, granite, ceramic and porcelain tile surfaces in lieu of the microscopic etching product, No. 1001 Trusty-Step Anti-Slip Floor Treatment, to retain optimal polish and sheen.

"We're excited to now offer a safe and proven alternative to our popular microscopic etching treatment," explains Stan Handman, Founder of Trusty-Step International. "As we continue to expand our product and service line, we remain committed to supporting our client's needs for safety, innovation and beauty."

No. 1222 Non-slip acrylic coating with crystal clear polycarbonate aggregate can be used on both indoor and outdoor surfaces, with slip resistance exceeding ASTM, OSHA and ADA requirements. The company guarantees all treated floors have a Static Coefficient of Friction (SCOF) reading of 0.06 or greater, the minimum measurement required for horizontal surfaces by the Americans with Disabilities Act.

About Trusty-Step International:

Founded in 1989, Trusty-Step International provides anti-slip floor products guaranteed to ensure a Static Coefficient of Friction (SCOF) reading of 0.06 or greater. This level ensures safety compliance with ADA, OSHA and most major insurance carrier regulations. Trusted by builders, architects, interior designers and businesses nationwide.
