

EASEUS Partition Master Gives You DIY Hard Disk Management without Data Loss

NEW YORK, N.Y., Jan 6 (SEND2PRESS NEWSWIRE) – Want to create a new partition for a dual boot system, or just extend the existing system partition for Windows 7 installation? Plan to manage hard disks skillfully by yourself? EASEUS Partition Master, the “magic” partition manager and system optimization software for Windows-based administration, helps you manage a hard disk easily and safely, no matter whether you are a beginner or advanced user.

EASEUS Partition Master, highly recommended by editors of the most respected IT sites and by its users, is a truly comprehensive partition manager for Windows 2000/XP/Vista/Windows 7 and Windows server 2000/2003/2008. No matter whether you want to create new partitions for a dual boot system installation or manage your hard disk as you wish, this partition manager will give you a simple way to manage your hard disk just by yourself and without data loss. It helps resize/move a partition without data loss – even dynamic disks – extend the system partition, and create/delete partition for Windows 7 upgrades.

And the remarkable feature for those who manage servers is that this “magic” partition manager enables you to extend NTFS system partitions without reboot, which will minimize the server downtime yet maximize the server performance without data loss. It works well with hardware RAID and virtual disk, too.

Besides the many useful partitioning features like copy partition/disk, label partition, and create bootable CD, this will simplify your tasks to wholly manage your hard disk. With the easy interface and just a few clicks, EASEUS Partition Master is certainly a must-have partition tool to manage hard disks.

Pricing and Availability:

A Web Special of \$159 (original \$199) for Windows Server users is available if you buy it from EASEUS' Website at:
