

# EASEUS Partition Master – Free Partition Manager Helps Create Dual Boot Windows 7 with XP or Vista

NEW YORK, N.Y., March 10 (SEND2PRESS NEWSWIRE) – As Microsoft® Windows 7 has proved to be quite the drastic improvement over Vista, creating a dual boot Windows 7 system with XP or Vista would be a better choice for those who are still not willing to give up Windows XP or Vista, yet are dying to try out Windows 7. The question is: how to create a dual boot system with Windows 7, along with XP or Vista?

People who have installed a dual boot system know it is not a difficult thing if you do know how to create a new partition for Windows 7. The Windows Disk Management utility that comes with the Windows operating systems can graphically display partitions but when it comes to management features, it is pretty limited.

Just as many famous IT editors have recommended, if you need more partitioning operations than the Windows native Disk Management provides, you should take a closer look at EASEUS Partition Master™.

This utility offers all the standard and advanced features you'd want to have available in a disk partitioning tool, and it helps create a dual boot Windows 7 system with XP or Vista with a fairly basic procedure while keeping data intact:

1. Resize your current OS drive to free up enough space for a Windows 7 partition.
2. Create a new partition from the newly freed space.
3. Apply your changes.

And you can also learn more here about how to create a Windows XP and 7 dual-boot system staged for an easy migration (<http://blogs.techrepublic.com.com/window-on-windows/?p=1728> ).

## **Pricing and Availability:**

Web Special \$159 (originally \$199) for Windows Server users is available if you buy it from the EASEUS Web site at [partition-tool.com/easeus-partition-manager-server/](http://partition-tool.com/easeus-partition-manager-server/).

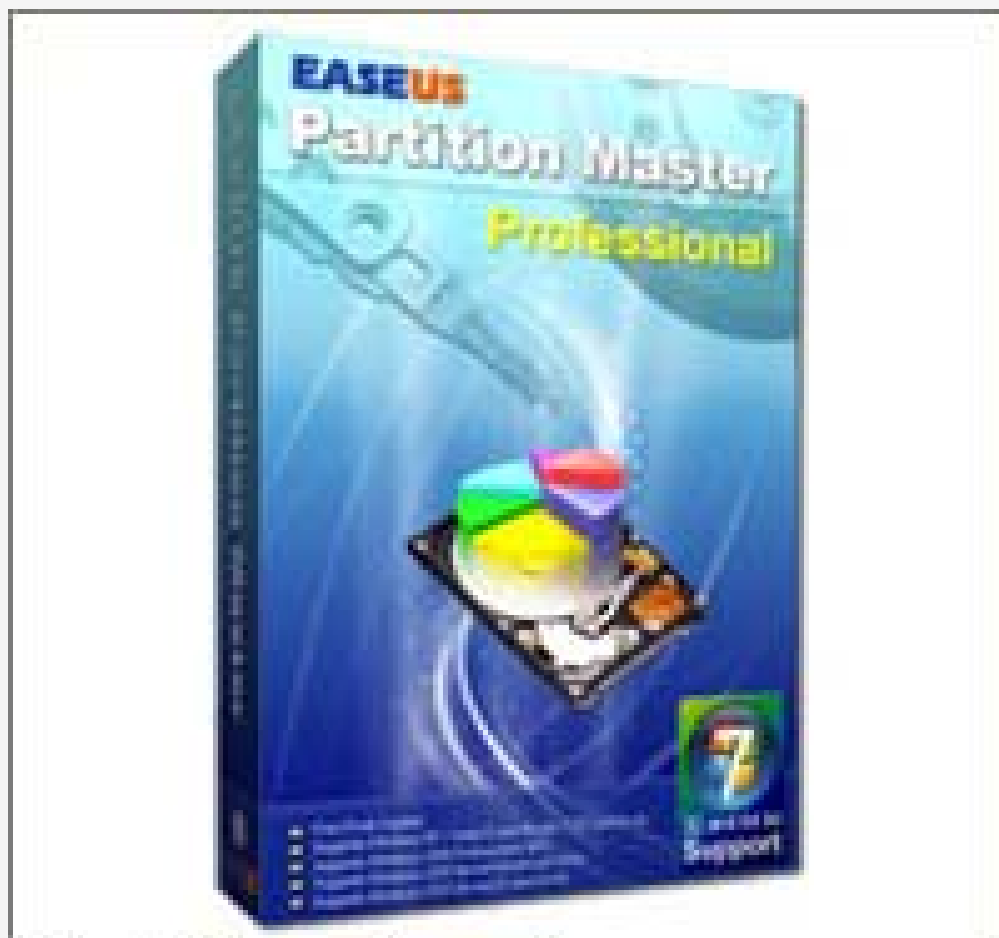

EASEUS Partition Master Professional Edition is available at the price of \$39.95 directly from EASEUS' Web site at [partition-tool.com/professional.htm](http://partition-tool.com/professional.htm).

Additionally, free for home users, EASEUS Partition Master Home Edition enjoys most of the commercial version features and works well under Windows 2000/XP/Vista and Windows 7 32-bit. Download it now here: [www.partition-tool.com/personal.htm](http://www.partition-tool.com/personal.htm).
