

Meet Annual Hazardous Waste Training Mandates at Two Day Workshop

HOUSTON, Texas, July 7 (SEND2PRESS NEWSWIRE) – Lion Technology Inc., a nationally recognized regulatory compliance training firm, will present its two-day Hazardous/Toxic Waste Management workshop series during the month of July and August. The course is designed for compliance professionals who must be trained annually under the RCRA hazardous waste regulations. Workshops will be held in Little Rock, AR on August 9-10; Tulsa, OK on August 12-13; Houston, TX on August 18-19; and Dallas, TX on August 23-24, 2010.

The workshop provides hands-on application of the Federal Hazardous Waste Regulations (40 CFR 206-279). Students learn how to identify regulated waste, properly handle and store waste on site, prepare waste for off-site shipping, protect their site in the event of an emergency, keep records, and prepare their site for new regulatory changes.

Lion Technology Director of Corporate Training, Scott Dunsmore, a national expert on hazardous waste management, stresses that proper hazardous waste handling, management, and disposal is critical, especially in light of rising enforcement, which is now \$37,500 per day/per violation.

“With a slow economy and budget tightening, the reflex is to go towards shorter and inexpensive training options. However, with enforcement initiatives on the increase, shortchanging your training puts you at risk of costing you more in the long run.”

Tuition is \$795 per person, with group discounts available. Registration includes course reference materials, networking luncheon, certificate of achievement, and one year of follow-up support. Registration starts at 7:30 a.m., and the workshop runs from 8:30 a.m. to 4:30 p.m. Pre-registration is highly recommended. To register, call (888) 546-6511 or visit us online at www.Lion.com/HazWasteTrainingNow.
