

Multimodal Workshop by Lion Technology Teaches Hazmat Shippers The Latest Regulations

DALLAS, Texas, July 19 (SEND2PRESS NEWSWIRE) – The Department of Homeland Security (DHS) and the Department of Transportation (DOT) have stepped up enforcement to reduce undeclared and illegal hazmat shipments via airline, truck, rail, and ship. Undeclared shipments of hazardous materials are predominately aerosols and flammable liquids (e.g., paint and paint-related materials), as well as batteries, fireworks, dry ice, perfume products, and cigarette lighters.

Before a hazardous material is transported in commerce, it must be properly classified, described, packaged, marked, and labeled as prescribed by the DOT Hazardous Materials Regulations (49 CFR). The DOT also mandates that all hazmat employees who “directly affect the safety of hazardous materials transportation” be trained and tested on these same regulations. Hazmat employees must have additional training on the IATA Dangerous Goods Regulations and IMDG Code if shipping by air or ocean.

To help the regulated community understand the rules for multimodal hazmat shipping, Lion Technology, the nation’s leader in regulatory compliance training, is presenting a how-to training series on the DOT, IATA, and IMDG regulations. Training on all three shipping modes will be held in Dallas, TX on September 13-16 and Houston, TX on September 20-23. Training on the DOT rules (ground only) will be held in Mobile, AL on August 30-31; Baton Rouge, LA on September 13-14; and San Antonio, TX on September 16-17, 2010.

The fee for the two-day DOT workshop is \$695 per person. Each additional day (IATA or IMDG) is \$495 per person. Group pricing is available. Registration includes course reference materials, networking luncheon, certificate of achievement, and one year of follow-up support. Registration starts at 7:30 a.m., and the workshop runs from 8:30 a.m. to 4:30 p.m. Pre-registration is highly recommended. To register, call (888) 546-6511 or visit us online at www.Lion.com/HazmatShippers.

The workshops feature in-depth discussions of the DOT Hazardous Materials Regulations (49 CFR) and the IATA and IMDG Dangerous Goods Regulations, with an emphasis on the differences between the regulations and the critical components of hazmat shipping, including classification, shipping papers, package selection, package marking and labeling, and recordkeeping.

About Lion Technology:..

Since 1977, more than 100,000 professionals have relied on Lion Technology to meet their regulatory compliance training needs. Lion offers comprehensive training and resources in the area of environmental, hazardous materials/dangerous goods transportation, and workplace health and safety compliance. Training is offered through nationwide public workshops, live web

seminars, online courses, and on-site programs. Regulatory support services and consulting are provided to assist industry comply with Federal and State laws and regulations.
