

Partition Recovery Boost with Partition Manager Solution – EASEUS Partition Master 6.1.1

NEW YORK, N.Y., July 30 (SEND2PRESS NEWSWIRE) – Partition Recovery, an easy-to-use function to undelete a partition and recover a partition which is lost by accident, is now integrated into the latest version of the leading partition manager software – EASEUS Partition Master 6.1.1, an updated version which has been launched today.

The Partition Recovery module of EASEUS Partition Master 6.1.1 provides two function modes: automatic and manual. Automatic mode will scan all the unallocated space on the disks automatically, and list the partitions for you to choose to recover; additionally, manual mode allows you to choose the unallocated space before scanning, and then follow the wizard to complete the partition recovery. Using both modes, it can recover your lost partition in a very quick fashion.

Partition Recovery, plus the copy wizard function of EASEUS Partition Master 6.1.1, provides double protection for data security. “Partition Recovery actually can be independent and useful recovery software itself; we integrate it into our professional partition manager software only to provide greater user experience and value-added service to our customers and to optimize our partition manager software continuously,” states one of EASEUS’ technicians.

Under the protection of its partition recovery and copy wizards, EASEUS Partition Master provides powerful functions as [partition manager software](#): extend partition, enlarge system/C drive, create/delete partition, merge/split partition(s) etc. It supports both basic and dynamic disks under Windows 2000/XP/2003, Vista/2008, Windows 7 (32 and 64 bit).

As an all-in-one partition manager software solution, EASEUS Partition Master 6.1.1 stays slim in size but not in features; its free home edition is as light as 8.41 MB while its charged professional edition, server edition and unlimited editions are less than 40 MB. Plus, the price of EASEUS Partition Master will stay the same and its free lifetime upgrade serial number is now on a time-limited Web special offer with 20% discount.

Pricing and Availability:

A “Web Special” price of \$159 (originally \$199) for Windows Server users is available from the EASEUS Web site at partition-tool.com/easeus-partition-manager-server/.

EASEUS Partition Master Professional Edition is available for \$39.95 from EASEUS’ Web site at www.partition-tool.com/professional.htm.
