

California Hazardous Waste Training Presenting in September

LOS ANGELES, Calif., Aug. 2 (SEND2PRESS NEWSWIRE) – Lion Technology Inc., a nationally renowned regulatory compliance training firm, will present its two-day Hazardous Waste in California workshop series during the month of September. These courses are designed for industry professionals who must assure compliance with California's hazardous waste regulations. Workshops will be held in San Diego on September 13-14; Los Angeles on September 16-17; Bakersfield on September 20-21; and Oakland on September 23-24, 2010.

The workshop features comprehensive coverage of the California Hazardous Waste Regulations (Title 22), including waste identification, management standards for universal wastes, on-site management requirements, manifesting, emergency planning and response, recordkeeping, and the latest legislative initiatives.

Lion Technology Director of Corporate Training, Scott Dunsmore, a national expert on hazardous waste management, stresses that proper hazardous waste handling, management, and disposal is critical, especially in light of rising enforcement, which is now \$37,500 per day/per violation.

“Regulators have often stated that inadequate or no training has been at the root of non-compliance. With a slow economy and budget tightening, the reflex is to go towards shorter and inexpensive training options. However, with enforcement initiatives on the increase, shortchanging your training puts you at risk of costing you more in the long run. Adequate training is essential to EHS excellence.”

Tuition is \$795 per person, with group discounts available. Registration includes course reference materials, networking luncheon, certificate of achievement, and one year of follow-up support. Registration starts at 7:30 a.m., and the workshop runs from 8:30 a.m. to 4:30 p.m. Pre-registration is highly recommended. To register, call (888) 546-6511 or visit us online at www.Lion.com/Title22Training.
