

Convert Dynamic Disk to Basic without Losing Data with Dynamic Disk Converter 3.1

NEW YORK, N.Y., Aug. 18 (SEND2PRESS NEWSWIRE) – Dynamic Disk Converter is professional disk conversion software released by Aomei Technology. Its outstanding feature is to [change or convert a dynamic disk to a basic disk](#) on the basis of ensuring data integrity protection. It is easy to convert a basic disk to dynamic by using Windows' built-in disk management utility, but difficult to convert back unless you choose third-party software, like [Dynamic Disk Converter](#). Along with continuous updates, it has been upgraded to version 3.1 at present.

In the latest version, it brings the following advantages:

- Quickly change dynamic to basic disk within 3 to 10 seconds.
- Support to convert mirrored volume disk and invalid dynamic disk into basic disk.
- Support to clone any dynamic volume to basic disk.
- Ensure windows bootable and data security after the conversion back.
- Avoid losing any data during the conversion from dynamic to basic.
- Support file systems including FAT, FAT32, exFAT, NTFS and Linux file system, etc.
- Support the maximum disk size of 2TB.
- Work flawlessly on Windows 7, Vista, XP, 2000 and Windows Server 2003, 2008.

Many personal users may use Windows home OS(s), such as XP, Vista, and Windows® 7 Home Edition, etc. All of the “home” versions of Windows do not support dynamic disk, so dynamic disks are widely used in server platforms like Server 2003 and 2008. In order to provide the better service scope and meet more clients' requirements, the upgraded Dynamic Disk Converter 3.1 works wonderfully with the Windows Server environment.

To minimize server downtime, it takes just 3-10 seconds to do the conversion operation, so it is becoming more and more popular with its growing high reputation and positive reviews. Please refer to the conversion instruction, [“Convert Dynamic Disk to Basic within 3-10 Seconds,”](#) on the Dynamic Disk website.

For either a personal user or business PC owner, it costs just US\$29 online at:

dynamic-disk.com/dynamic-disk-convert-professional.html.

If you need to use it in a server platform, the special price is US\$59.96.
