

# Get Started to Partition a Hard Drive with Aomei Partition Assistant

NEW YORK CITY, N.Y., Aug. 30 (SEND2PRESS NEWSWIRE) – If you have partitions on your computer's hard drive, then it is not exactly the same but serves same purpose as having different hard drives. According to Aomei Technology, one of the primary objectives to have a partition in your hard drive is to distinguish an operating system from user work and data files. By doing this the user's files remain intact even if you have to reinstall the operating system files. Also, if you are preparing a single disk as a multi-boot set up, then you must have different partitions for every system.

Many users might opt for Windows' built-in disk manager for partitioning purpose. But there are many users who prefer to use a third-party free [partition manager](#) (like Aomei's Partition Assistant) available in the market which often have more useful features and are comparatively simpler to use.

Partition Assistant Home Edition – a free product from Aomei Technology – will allow you to create, format, delete, or repartition in your hard disk. Furthermore, you can also hide, unhide, move or resize the existing partitions keeping your data absolutely intact. When you buy a new hard drive, it needs to partition or format before using. How to partition a hard drive by way of creating, deleting, formatting and resizing partition? For step by step instructions, please visit: [extend-partition.com/resource/how-to-partition-a-hard-drive.html](http://extend-partition.com/resource/how-to-partition-a-hard-drive.html).

Because Partition Assistant is available at your disposal for disk partition and other disk related functionalities, thus, your work with your computer's hard drive is now much easier. Partition Assistant Home Edition is completely free of charge to suit your needs and also supports 32-bit operating systems such as Windows 7, Vista, 2000 and XP. Freely experience the product and download it at: [extend-partition.com/free-partition-manager.html](http://extend-partition.com/free-partition-manager.html).

Partition Assistant is available in two different editions: Professional Edition and Server Edition. Pro Edition runs in Windows 7/Vista/2000/XP (both 32bit and 64bit) and costs \$29.00. Server edition covers all functions of the Partition Assistant Pro Edition as well as supports Windows Server 2003, 2008 and 2000, costing \$95.92.

To download the Pro edition: [extend-partition.com/partition-manager-pro-edition.html](http://extend-partition.com/partition-manager-pro-edition.html).

Server edition: [extend-partition.com/partition-manager-server-edition.html](http://extend-partition.com/partition-manager-server-edition.html).
