

New Updated EASEUS Partition Master 6.5.1 Now Available!

NEW YORK, N.Y. (SEND2PRESS NEWSWIRE) – EASEUS Software, the leading provider of affordable, scalable partition management, data recovery and disaster recovery utilities, today announced availability of **EASEUS Partition Master 6.5.1** – a comprehensive disk and partition manager tool for Windows-based PCs and servers. This updated version adds more features like **supporting removable storage device**, convert primary/logical partition, wipe partition – making it is one of the most powerful disk and partition managers available today. More good news is that all the new features are also available in the free edition for home users.

Aiming to develop a more **powerful disk and partition manager** utility for both Windows PC and server users in this market, EASEUS Software Group always tries hard to study new technologies to continuously strengthen the features of its partition manager. A more friendly and simpler user interface is improved in this version along with newly-added partitioning features developed in response to its customers' feedback.

EASEUS Partition Master 6.5.1 brings together partition manager, disk and partition copy and partition recovery wizard tools, while still allowing you to enjoy almost all needed disk management features like extend system partition, resize/move, create, delete, copy, recover, wipe partition, etc.

New in EASEUS Partition Master 6.5.1:

- * Support partitioning of removable storage devices like flash drives, memory cards, etc.
- * Convert primary partition to logical, convert logical partition to primary;
- * Linux partition management: delete, create, format, recover EXT2/EXT3 partition;
- * Wipe partition for privacy security;
- * Disk surface test to check and find bad sectors.

EASEUS Partition Master 6.5.1, the professional partition manager and system optimization software, supports almost all basic and advanced features of partitioning on hard drive, external hard drive, dynamic disk, hardware RAID, removable storage devices and enables you to manage partitions under Windows 2000/XP/Vista/7 and Windows server 2000/2003/2008.
