NEW YORK CITY, N.Y. (SEND2PRESS NEWSWIRE) – EASEUS released its [free 32-bit and 64-bit partition manager software](#) for Windows 2000, XP, Vista, and Windows 7 early this Monday. EASEUS Partition Master Home version 6.5.2 is available for all home users, both 32-bit and 64-bit OS machines are supported.

Since 64-bit is more and more popular, many home users run 64-bit machines; EASEUS offers its free partition manager software free for both 32-bit and 64-bit users. [Partition Manager](#), Disk/Partition Copy Wizard and Partition Recovery Wizard, all three modules of the well-known partition manager software are included in the newly released freeware.

The previous versions of EASEUS Partition Master Home Edition are really popular as partition manager software solutions; it keeps the “number one download” amount record under partition management utility on the most popular download sites like [www.download.com](#) and others. But it only supported 32-bit machines before, and all 64-bit users needed to pay for the Professional license, no matter whether home users or business users.

“Free and reliable partition manager software is what EASEUS has been trying to provide all these years,” said Mr. Liu, of EASEUS. “We led the way to provide EASEUS Partition Master Home version free for 32-bit home users, now we see that 64-bit is becoming common among home users, so we follow the trend and provide EASEUS Partition Master Home version 6.5.2 with 64-bit system capability.”

Functionally, EASEUS Partition Master Home version 6.5.2 will be the same as EASEUS Partition Master Professional Edition version, but it is for home users only. For business workstation users, [EASEUS Partition Master Professional Edition](#) with bootable CD available would be the right choice, which will also enable priority support service.
