

Edupoint Launches Mobile Initiative with Release of TeacherVUE, ParentVUE and StudentVUE Apps

IRVINE, Calif., Dec. 2 (SEND2PRESS NEWSWIRE) – Edupoint™ Educational Systems, a leading provider of student information systems (SIS) to the national K-12 education market, has launched a comprehensive mobile initiative designed to improve the access to student and classroom information for teachers, administrators, parents and students. The company's GENESIS™ product suite has been enhanced with mobile-friendly applications for the iPhone® and iPad®.

The initiative is driven by Edupoint's overall vision for its GENESIS student information suite: to empower everyone with a role in the education process – teachers, principals, counselors, parents and the students themselves-to share and access the information they need to do their unique, essential part in helping each student reach their highest level of achievement.

Edupoint will release several free apps this month including TeacherVUE™ for the iPad and ParentVUE™ and StudentVUE™ for the iPhone. In its initial release, TeacherVUE™ for the iPad provides teachers the ability to access student demographic and schedule information, view and modify seating charts and take attendance from the iPad. Additional functionality is already in development.

The ParentVUE and StudentVUE apps for the iPhone provide parent and student access to student information such as grades and attendance in much the same way as the ParentVUE and StudentVUE web portals. "Edupoint has a long track record of delivering innovative solutions to the K-12 market and these latest products are just one example of how we continually provide additional value to our education customers," said Rob Wilson, Edupoint's President.

"As the number of mobile devices continues to grow and as the capabilities of these devices increase, so too will Edupoint's investment in mobile applications. Our mobile solutions will focus on delivering timely, on-demand access to information, enhanced communication, and improved efficiencies for all K-12 stakeholders."

About Edupoint Educational Systems:

For thirty years, the leadership of Edupoint Educational Systems, LLC, has set the standard for K-12 student information management systems. Their innovative solutions have been used by thousands of schools to manage millions of students. Today, the company empowers a new era of self-sufficient school districts with solutions built on Revelation Technology™, its extensible, scalable, rapid application development platform. Those solutions include Genesis™, an enterprise-level student information system, and Genesea™, a comprehensive special education management system.
