

EASEUS Partition Master 7.0.1 Newly Upgraded for Managing Hard Disks Larger Than 2TB

NEW YORK CITY, N.Y., Jan. 24 (SEND2PRESS NEWSWIRE) – EASEUS Software, the leading provider of affordable, scalable partition management, data recovery and disaster recovery utilities, today announced availability of its newly upgraded hard disk and partition manager – EASEUS Partition Master 7.0.1. It comes with new features to support managing hard drive up to 4TB, including GPT drive and RAID, this version is the first hard disk manager software supporting disk over 2TB and will free users from 2TB partition/disk limit size.

With this new feature, EASEUS Partition Master 7.0.1 provides a comprehensive and powerful hard disk and partition management solution to manage hard disk from 2GB to 4TB and make large disk management over 2TB easy to use. It allows users to perform both **basic and advanced disk management** operations on the disk/partition larger than 2TB, say, resize/move volume, extend system volume, create volume over 2TB, copy volume, convert MBR disk to GPT drive, etc.

EASEUS Partition Master 7.0.1 is the first partition manager software that compatible with disk up to 4TB, it supports Windows 2000/XP/Vista/7 and Windows server 2000/2003/2008 and works well with hard drive, external hard drive, dynamic disk, hardware RAID, GPT and removable storage device.

GPT and RAID with large capability are widely used by most companies and enterprises, EASEUS partition manager software will no doubt largely simplify users' work, especially for server users. "We aim to find users' needs, meet users' needs, and make users' work easy!" said Mr. Liu, CEO of EASEUS Software, "EASEUS Software Group should continuously strength the features of its partition manager software to make larger disk management possible and help users manage their PCs and servers easily."
