

Anytime Collect Now Available for Intuit QuickBooks, Peachtree by Sage and Other Accounting Systems

CHARDON, Ohio, Feb. 3 (SEND2PRESS NEWSWIRE) – e2b software (www.e2bsoft.com), a business application developer based in Chardon, Ohio, announced today that its flagship credit management and accounts receivable collections software Anytime Collect is now available for such popular accounting applications as Intuit QuickBooks and Peachtree by Sage. A general interface is also included in the latest release for companies using other accounting systems. In addition to the new interfaces, Anytime Collect is available on a monthly subscription basis starting at just \$89.

“Our research indicates that smaller companies often struggle more than mid-size or larger companies when it comes to managing cash flow and outstanding accounts receivable,” said e2b software President Bill Henslee. “Our new subscription pricing and product editions allow smaller companies using entry-level accounting applications like QuickBooks and Peachtree to more effectively manage their credit and collections processes.”

According to a 2010 survey from Atradius Group, nearly 40% of all invoices in America are paid late. “The impact of getting paid late or not at all for an invoice can be huge for some small businesses,” Henslee says. “We created integrations for Anytime Collect to QuickBooks and Peachtree to provide smaller companies with the same types of tools to manage their credit risk and accounts receivable collections that their larger counterparts in Corporate America enjoy.”

Anytime Collect helps businesses reduce outstanding business to business (B2B) accounts receivable through automated business processes, easy access to account information and integration to popular accounting software as well as email applications and phone systems.

Henslee says: “Thanks to a highly intuitive dashboard featuring customer AR balances, collection activity summaries and a daily cash summary, small businesses owners now have timely and actionable information to better manage their day-to-day operations.”

About e2b software:

e2b software (www.e2bsoft.com) develops, sells, and supports Microsoft-centric, plug-and-play business applications including Anytime Collect credit and collections management (CCM) and e2b 500 supply chain solutions. Anytime Collect (www.anytimecollect.com) integrates with popular accounting applications enabling finance and credit professionals to reduce outstanding receivables, track activities, automate communications, manage documents, forecast payments, and effectively manage invoice disputes.
