

# Team TSI, LLC, National Installation Contractor, Announces the TSI Formenator: the First Android Application Created for the Mobile Installation Industry

ORLANDO, Fla., Feb. 17 (SEND2PRESS NEWSWIRE) – Team TSI, LLC ([www.team-tsi.com](http://www.team-tsi.com)), a National Installation Contractor, announces an industry first, the TSI Formenator™. This is the first Android application geared towards the mobile fleet installation business. The application is built on the widely used Android platform and is designed to assist all Team TSI installation technicians and partners with updating vehicle and job related information from any Droid® powered phone while completing field installations for Team TSI.

This free app is available to all partner installers in the Team TSI family. This app will allow the upload of the vehicle's identification number, tag #, truck number, On Board Diagnostics (OBD) info, input and output connections, wire color codes, "The TSI 5" required installation photos, unit serial numbers, Electronic Serial Numbers (ESN), test codes, customer signature and other order details. This information is then available real-time in the TSI Tracker database for our vendors, partners and customers to access for reporting and project management purposes.

"We are very pleased to offer this new tool to our partners and technicians; it will dramatically reduce installation times throughout the paperless process while eliminating legibility and transcription errors. All you need is an Android based smartphone operating on any network, high quality installation skills and customer service mindset to work with the most trusted name in the commercial fleet installation business," stated Craig Finlay, CEO of Team TSI.

## **About Team TSI:**

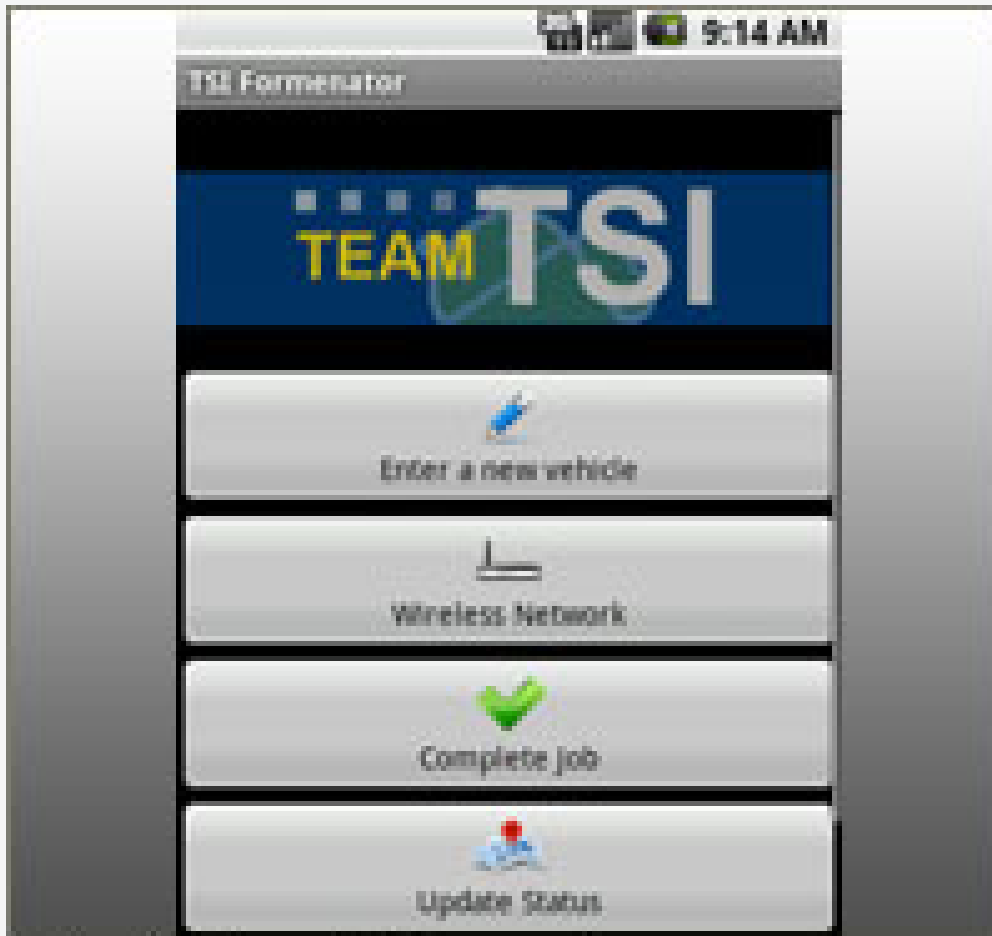

Team TSI is an installation solutions provider dedicated to the manufacturer, its customers and partners by providing full-service turnkey logistics, project management and ongoing support. Team TSI specializes in the installation of GPS tracking units, telematics, mobile laptops, RFID, fuel management systems, video based fleet safety systems, on-board computers, hands-free car kits, two-way radios, navigation units and other mobile electronics into the largest commercial fleets in the country as well as Wi-Fi and structured cabling systems into Fortune 1000 companies across the US.

Team TSI has pioneered many new technologies and policies in the GPS tracking industry including TSI Tracker, a proprietary, web based application for ongoing project management and customer support, and "The TSI 5," specific

required photos of every installation Team TSI performs in order to assure the same high standard of quality Team TSI demands of all technicians and partners. These technologies, when combined with the experience Team TSI has earned through over 265,000 vehicles installed across the US in the last 13 years, guarantees we deliver a world class experience. Team TSI utilizes a combination of in-house technicians and strategic partners to deliver the best installation experience in the industry.
