

New Updated! EASEUS Partition Master 7.1.1 Now Supports Windows 7 SP1 and Windows 2008 R2 SP1

NEW YORK CITY, N.Y., March 7 (SEND2PRESS NEWSWIRE) – EASEUS Software, the leading provider of affordable, scalable partition management, data recovery and backup utilities, has updated its Windows hard disk and partition manager EASEUS Partition Master to version 7.1.1. This new release is mainly to add support for Windows 7 Service Pack 1 and Windows Server 2008 R2 SP1.

EASEUS Partition Master 7.1.1 is the pioneer partition manager software that is compatible with Windows 7 SP1 and Windows Server 2008 R2 SP1. With this new feature, it provides a comprehensive and powerful hard disk and partition management solution for those who have just installed Windows 7 Service Pack 1 or Windows Server 2008 R2 SP1 to manage hard disk easily.

Bringing together basic and advanced partitioning features – including Partition Manager, Disk & Partition Copy Wizard and Partition Recovery Wizard – EASEUS Partition Master 7.1.1 is an all-in-one hard disk partition manager toolkit for both PC and server users. It can resize a partition without reboot, extend the system drive, copy disk & partitions, recover a deleted or lost partition, and convert a dynamic disk and much more.

This new release works well with hard drives, external hard drives, hardware RAID, dynamic disks, GPT disks and other removable storage devices; it helps settle almost all low disk space and disk management issues under Windows 2000/XP/Vista/7 and Windows server 2000/2003/2008.

Highly praised by its users from the famous site Download.com, EASEUS Partition Master 7.1.1 will be another success for EASEUS and partition management market. According to one user: “Excellent and VERY EASY tools! EASEUS Partition Master is a great tool. It supports large drive partitions, resizes, deletes and verifies partition integrity. Great product! Thanks to Easeus for developing this – a great program!”
