

IDS Enhances Mortgage Document E-Signature Options for Its Flagship idsDoc Platform

SALT LAKE CITY, Utah, March 14 (SEND2PRESS NEWSWIRE) – International Document Services, Inc. (IDS), a [mortgage document preparation](#) vendor, has enhanced the e-signature options for the idsDoc platform. Changes were made based on the feedback and demand of customers and reflect the growing demand for more sophisticated e-signature capabilities that also keeps the process simple for borrowers and lenders alike.

“Over the past 10 years, the buzz has been that e-signatures are just around the corner, and not that technological advances have converged with industry demand, the time was right for IDS to develop e-signature capabilities that would actually be able to meet and exceed customer expectations,” said Curt Doman, president of IDS. “Flexibility is an integral part of the IDS business model, and we’re constantly striving to stay ahead with technology, innovation and customer demand to expand our services.”

The latest version of the IDS e-signature platform, Version 3.0, includes enhancements and features to the e-sign and fulfillment functionality of idsDoc to make the e-signature process simpler for borrowers and easier to manage for lenders. In Version 3.0, borrowers have the ability to save and e-mail documents to themselves, view their progress and status throughout the signing process and receive real-time progress notifications so that they can stay up-to-date on the status of their loan at all times.

In addition, loan officers get frequent status updates and enhanced tracking abilities to better monitor the e-sign process. Version 3.0 includes an archive feature that allows borrowers, lenders and loan officers to retrieve and view previously signed documents.

Also included in Version 3.0 is an upgraded interface to make the switch between borrower and loan officer screens easier; click-and-sign capabilities for lenders, loan officers and borrowers; and client-specific features, such as the ability to create lender-specific instruction documents for borrowers and custom print order capabilities. In addition, Version 3.0 has enhanced privacy features and identity verification procedures to ensure compliance with e-signature regulations, as well as requirements from IDS customers and industry investors.

About IDS Inc.:

IDS is a nationwide provider of mortgage documents and compliance. IDS services include closing documents, reverse documents, initial disclosures and fulfillment.
