

Tairo International Selects Southeast Computer Solutions and Sage ERP MAS 200 as its Premier Solution

MIAMI, Fla., May 25, 2011 (SEND2PRESS NEWSWIRE) – Southeast Computer Solutions (www.southeastcomputers.com), a leading business partner of Sage Software, announced today that perfume distributor, Tairo International, has selected Sage ERP MAS 200 as its business management solution.

Tairo International will integrate their warehouse operations with their back office accounting procedures to achieve better operational efficiencies, create streamlined processes, and gain more accurate and timely business reporting. Tairo International is a leader in fine fragrance and cosmetic distribution throughout the U.S., Caribbean and Mexican Duty Free Markets.

The company plans to use the features in Sage MAS 200 ERP to facilitate the distribution process to their U.S. and overseas markets.

“When Tairo reached out to us, they were hoping to move away from an environment with disparate, customized systems – one order processing systems and a separate accounting system – and move towards a fully integrated, real-time system that would allow Tairo to trust their data and make business critical decisions immediately as well as leverage up to date tools and functionality,” said Ralph Ceccarelli, vice president of SCS. “Our experience of the fragrance distribution industry, allowed us to design and configure a MAS 200 system – with minimal customizations – that would allow Tairo to leverage modern, robust standardized tools to manage their business, while automating several industry specific, mission-critical processes.”

“It’s important for us to be as efficient as possible with the staff we have on hand, Sage ERP MAS 200 allows us to automate several of our distribution processes and reduces our manual and paper intensive processes,” said Bryan Hollander, Vice President, Tairo. “With Southeast Computer Solutions implementing and supporting our new system we know our business decision makers now will have the time and tools to make decisions for the company’s future.”
