

Telovations Launches Anywhere4office 4G Enabled Business Class Communications

TAMPA, Fla., May 25, 2011 (SEND2PRESS NEWSWIRE) – Telovations, Inc., a leading provider of Cloud Communications services to businesses has launched Anywhere4office(SM), a business class communications solution using Cisco SPA525G wireless IP phones, Telovations' Cloud PBX services and 4G wireless connectivity. Anywhere4office is a perfect solution for businesses that need to set up disaster recovery locations. It is also ideal for anyone working away from the office: traveling professionals, work teams, or temporary field offices. Organizations can take advantage of any secure 4G WiFi network to easily add business-class voice and data features that the entire company can leverage.

Using the 4G wireless router, phones can be set up with plug 'n' play simplicity – instantly connecting users to the rest of the company network using the same features, dialing plan, full DID phone numbers, and extension dialing. The Telovations Toolbar, Web conferencing, Unified Communications dashboard and Outlook integration are also available to the Anywhere4office user, along with full call detail records.

“Telovations Anywhere4office is a natural extension to our mobility and business continuity offerings,” said Mark Swanson, Telovations' CEO. “The ability to quickly set up a mobile office anywhere you want and instantly establish business class communications provides the flexibility needed in today's dynamic business environment. It reinforces collaboration over collocation meeting the needs of the 21st century business.”

With the increasing number of disasters in the headlines, Anywhere4office provides a low cost way for businesses to maintain continuity no matter what. Disaster Recovery is a critical issue and Anywhere4office joins Telovations' Disaster Redirect, Remote Office and Anywhere business continuity offerings to keep companies connected.

About Telovations Inc.:

Based in Tampa, Florida, Telovations is a next-generation managed service provider pioneering the delivery of business communications in a Software-as-a-Service model referred to as “Communications-as-a-Service” or CaaS. CaaS from Telovations enables businesses to deploy communications devices and applications on a pay-as-you-go, as-needed basis thus eliminating the need for capital investment and ongoing overhead. Offering the latest communications technology coupled with a Quality of Service guarantee, Telovations provides businesses both flexibility and scalability that they might not otherwise afford. Telovations' services offer a compelling alternative to traditional telecommunication services.
