

Governor Honors West Virginia Export Businesses – Backbone Security Receives Commendation for International Market Entry

FAIRMONT, W.Va., June 23, 2011 (SEND2PRESS NEWSWIRE) – Gov. Earl Ray Tomblin presented the Governor’s Commendation for International Market Entry to Backbone Security along with representatives of 48 other West Virginia businesses assembled at the State Capitol in Charleston yesterday. The award honors companies that have successfully exported to a new country in the past year.

Gov. Tomblin joined the West Virginia Export Council and the West Virginia Development Office on June 22 to commend the West Virginia companies.

“West Virginia businesses are competing in today’s marketplace, whether it is around the corner or around the world,” said Gov. Tomblin. “Our businesses, big and small, are succeeding in expanding their sales horizons to new markets, creating and retaining jobs here at home.”

This award is based on the tradition of displaying the first dollar a business earns. The Governor’s Commendation for International Market Entry frames currency from each new country to which the recipient business began exporting in 2010.

Send2Press® Newswire

Backbone was recognized for exporting their state-of-the-art digital steganography detection and hidden information extraction products developed in their Steganography Analysis and Research Center (SARC) to Malaysia, Russia, and the United Kingdom.

For additional information about Backbone’s digital forensics and network security products, please visit the SARC web site at www.sarc-wv.com . To request a product information packet, please send email to sarc@backbonesecurity.com or call (877) 560-SARC.

About Backbone Security:

In addition to the world class digital steganography research and development conducted in the SARC, Backbone is an Approved Scanning Vender (ASV) certified by the Payment Card Industry-(PCI) Security Standards Council to conduct automated PCI Data Security Standard compliance assessments with a One-Stop Scanning Solution. Backbone also provides real-time intrusion monitoring, vulnerability assessment, penetration testing, and business continuity and disaster recovery planning services. Information: www.backbonesecurity.com .

About the SARC:

The SARC is a Center of Excellence in digital steganography research and development within Backbone Security. The SARC has established the world's largest commercially available repository of digital steganography applications, fingerprints, and signatures and has developed industry leading computer forensics and network security steganalysis tools for detecting and extracting information hidden with digital steganography applications.
