

# Now It's Easy to Backup Data on a Network with EaseUS Todo Backup

NEW YORK, N.Y., Sept. 21, 2011 (SEND2PRESS NEWSWIRE) – EaseUS Software, a leading provider of storage management, data recovery, data backup and system disaster recovery solutions, today announces it is easy to fully protect network data with EaseUS Todo Backup, an advanced backup software with comprehensive and easy to use backup features to backup network data in several ways, such as schedule backup, full backup, incremental backup and differential backup.

**EaseUS® Todo Backup** – especially its free edition – surpasses all Windows built-in backup and other free backup software in protecting your network data now.

Nowadays computer networks are widely used around the world, which allow users to share files with friends, family, coworkers and customers. Networks give more flexible options. However, it is also a potential danger to lose critical files because of some accidents, such as computer crash, network virus, etc. So backing up network files regularly should be put into consideration in everyday life.

As a multi-function backup software, EaseUS Todo Backup now can help users to **comprehensively backup network data** like schedule backup, full backup, incremental backup, differential backup into local hard drives, external hard drives, CD/DVD, tape device and other storage devices.

Apart from network data backup, EaseUS Todo Backup also provides other powerful features, such as disk and partition backup, one-click system backup, **one-click system recovery** to different hardware, incremental backup, **differential backup**, schedule backup, disk and partition clone, etc. It works well with Windows 2000/XP/Vista/7 and Windows Server 2000/2003/2008 as well as MS SQL Server 2000/2003/2007 and Exchange Server 2005/2008.
