

New Upgrade! EaseUS Unveils Todo Backup 3.5 with Remote Backup and Recovery Management

NEW YORK CITY, N.Y., Oct. 31, 2011 (SEND2PRESS NEWSWIRE) – [EaseUS Software](#), a leading provider of data backup and disaster recovery and storage management solutions for Windows environment, today announces the general availability of [EaseUS Todo Backup 3.5](#). To remotely backup and restore another computer within a Local Area Network (LAN) is now available in Version 3.5. With a more user-friendly interface and improved backup functions, EaseUS Todo Backup will certainly become a multi-functional backup software.

Based upon EaseUS' data protection technology, its built-in [EaseUS Todo Backup Remote Console](#) enables you to effectively set up and manage backups for a remote machine, reducing the downtime and losses to minimum. As long as you have installed EaseUS backup software on that machine, the system, applications, photos, video, music can be backed up or restored remotely. More, scheduling backups for the remote machine is also available.

The Remote Console is an independent module that can run without EaseUS Todo Backup main program. Just input an IP address of the remote computer, the username and password, and you can manage your backup as easily as on the local computer.

With the advanced backup features like one-click system backup and recovery, [Exchange/SQL Server backup](#), incremental and differential backup, EaseUS Todo Backup 3.5 also stresses the improvement in convenient backup. Now, users are allowed to send email notification to multiple accounts instead of one, and domain users can create a backup schedule, etc.

“To provide a more comprehensive and automatic backup software is the core,” said Mr. Liu, CEO of EaseUS, “and we are dedicated to developing and researching an all-in-one data protection.”
