

EaseUS Todo Backup Upgrades to Support Exchange 2010 and Brings a New Version of Central Management

NEW YORK CITY, N.Y., Dec. 30, 2011 (SEND2PRESS NEWSWIRE) – 2012 is coming, but it's not the end, it's a new start. At the beginning of the New Year, **EaseUS Software**, a leading provider of data recovery, partition manager and backup utilities, announces general availability of **EaseUS Todo Backup 4.0**. Exchange 2010 backup is available in this version. Moreover, the new release of **EaseUS Todo Backup Central Management Console** enables you to deploy backup plans to multiple clients.

Built upon EaseUS' data protection technology, EaseUS Todo Backup 4.0 can backup GPT disk and exchange 2010 with a brand-new interface. With previous functions like one-click system backup, differential backup, backup to tape, EaseUS Todo Backup aims to achieve a comprehensive backup and recovery process, and assure that all critical information is well protected.

"I like the new interface. It's a little more streamlined and easier to create and maintain backup plans," one of the beta users indicates.

Besides, the new released version EaseUS Todo Backup Central Management Console helps IT administrators remotely deploy backup plans for multiple installations of widely distributed EaseUS Todo Backup clients in a LAN, saving time and cost. What's more, it is exceptionally useful if whole companies are managed which requires the same individual policies reports; like the total amount of failed backups or how many backup failures have occurred over a period of time.

"We began to research central management in 2011 and we will perfect it in 2012. EaseUS will make your life easier in the coming year. Happy New Year!" said Mr. Liu, CEO of EaseUS® Software.
