

Loureiro Engineering Associates Announces Strategic New Hire and New Office Location

PLAINVILLE, Conn., Jan. 9, 2012 (SEND2PRESS NEWSWIRE) – Loureiro Engineering Associates, Inc. is carefully adhering to its strategic growth plan in the area of geographic expansion of services. This week it announced a new office location in Rockford, MA that will be managed by new hire, Samuel W. Butcher, LSP, LEP, PG, LEED-AP, vice president at Loureiro Engineering.

Butcher brings nearly 20 years of experience to the table. Prior to joining Loureiro Engineering, he was senior vice president of operations at a Massachusetts-based environmental consulting firm.

In his new role at Loureiro, he will work as a Licensed Site Professional. Responsibilities include managing and overseeing assessment and remediation of contaminated sites in Massachusetts in accordance with the Massachusetts Contingency Plan (MCP).

His particular interest and expertise is in the cleanup and redevelopment of underutilized contaminated properties. As a result, he will help clients to understand their responsibilities pertaining to the MCP in these areas.

Additionally, Butcher is a professional geologist and LEED-AP, credentials which complement his ability to provide assessment and remediation services to clients.

“Butcher shares the same ideals and values as Loureiro Engineering does when it comes to customer service,” says Brian Cutler, senior vice president of Loureiro Engineering. “Customer service is paramount in his work ethic.”

Finally, Butcher provides litigation support services and environmental consulting services across other regulatory programs including wetlands and underground storage tanks. He is also responsible for business development across a wide spectrum of Loureiro Engineering’s service offerings.

A member of the Town of Duxbury Conservation Commission which regulates activities in accordance with the state and local wetland bylaws and regulations, he is well positioned to lead this new office to overwhelming success.

“Having an office in the Boston metropolitan area now allows us to service areas that were beyond our reach before,” says Cutler. “Mainly, the Rockland office addresses a gap in service area coverage between Merrimack, NH and Wakefield, RI. “We are excited to have Butcher on board to oversee this new location; we have aggressive marketing and growth plans on the horizon.”

About Loureiro:

Loureiro has been providing engineering, construction, EH&S, and energy and waste management services to a wide variety of public and private sectors throughout the Northeast since 1975. Engineering service offerings include: environmental; site; transportation; water and wastewater; underground utilities; land surveying; structural; mechanical; electrical; plumbing; fire protection; and facilities engineering.

Construction capabilities include: heavy and highway; bridge; site development; underground utilities; remediation; demolition; concrete and general contracting.

EH&S services encompass: multi-media consulting and permitting; auditing; training; emergency planning and response; management systems consulting; professional resource support; and transportation compliance.

Energy services include: assessing energy reduction opportunities; energy modeling; training; alternative energy; and energy metrics and reporting.

Waste management capabilities address: management; transportation; and disposal of industrial, construction and universal waste.
