

# Newest Addition to Bonne Foi Anti-Aging Line is Lab Tested and Manufactured in Southern California

HUNTINGTON BEACH, Calif., Feb. 22, 2012 (SEND2PRESS NEWSWIRE) – Bonne Foi Beauty Products, an anti-aging skin care line, today, releases its Nourishing Face Cream which will further enhance the Bonne Foi line.

Created primarily for night time use, the [Nourishing Face Cream](#) will nourish, rejuvenate and moisturize your face, firming your skin and improving its overall appearance. Those with particularly dry skin or those who live in very cold climates may wish to use it as a day cream as well.

Its main ingredients include white shea butter, beeswax and seaweed extract. In clinical trials, shea butter was found to moisturize the outer layer of skin, protect against climate and UV aggressions, and prevent wrinkle formations. The seaweed extract, found in many of our products, is what helps firm skin, restore elasticity, and improves the complexion providing a more youthful skin tone.

Bonne Foi's Nourishing Face Cream does not contain any petroleum by-products or mineral oil as these ingredients can clog pores, suffocate skin, and cause premature aging.

Send2Press® Newswire

The chemist that formulated the Nourishing Face Cream had been developing [anti-aging products](#) for more than a decade when he began developing the Bonne Foi line of products. The formula is based on the theory developed by Dr. Peter Agre, who won the Nobel Prize in Chemistry in 2003 for his ground-breaking discovery of aquaporins which is used in the Bonne Foi product line. Aquaporins allow anti-aging and nourishing ingredients to penetrate skin down to the cell level.

Bonne Foi anti-aging skin care products are specially formulated to work for people of all ethnicities and on a wide variety of skin types and tones. This Nourishing Face Cream completes our night-time skin care regimen.
