

e2b technologies to Resell Intacct Cloud-Based Financial Applications

CHARDON, Ohio, March 22, 2012 (SEND2PRESS NEWSWIRE) – e2b technologies (www.e2btek.com), an ERP and CRM software provider and developer, announced today that the company is now an authorized reseller of Intacct cloud financial management and accounting applications. In use by more than 5,000 businesses worldwide, Intacct helps streamline financial processes and improve business visibility.

“Intacct is the strongest and easiest cloud accounting system on the market,” said e2b technologies President Lynne Henslee. “Additionally, Intacct helps businesses to greatly reduce IT costs because everything is included – eliminating additional licensing for databases, operating systems, storage, virtualization, back-up systems, and other ‘hidden’ costs that traditional, on-premises ERP systems require.”

One advantage that sets Intacct apart from other ERP publishers is their strong focus on nonprofits and professional service organizations. Intacct is especially well-suited for different types of businesses including software publishers, charities, charter schools, faith-based organizations, and business consulting companies.

“Intacct is one of the many leading business solutions that we represent,” Henslee said. “It not only gives us the leading cloud-based option for our customers, but it enables us to expand into new markets with deep solutions for nonprofits and service-driven organizations.”

With a growing number of employees operating remotely, cloud-based ERP solutions have become a great necessity when it comes to managing a company – especially when a company’s employees can’t be “on site.” With Intacct, users only need access to a computer with a web browser and an internet connection, allowing companies to manage their business anytime, and from anywhere.

“Intacct is focused on strategic additions to our channel program, and e2b technologies is another great partner for our program,” said Taylor Macdonald, vice president of Channels at Intacct. “e2b technologies is well known for their industry knowledge and high levels of customer satisfaction. We look forward to a long and successful partnership.”

e2b technologies recently signed on with SugarCRM, the fastest growing cloud-based CRM solution on the market. SugarCRM integrates with Intacct providing an end-to-end business solution for companies to manage marketing campaigns, sales pipelines, and internal or external customer support.
