

Hill PHOENIX Showcases Merchandising Flexibility and Innovative Case Design at FMI2012 Convention

DALLAS, Texas, May 1, 2012 (SEND2PRESS NEWSWIRE) – Hill PHOENIX will debut an exciting collection of new merchandising innovations at the 2012 FMI show April 30-May 3 at the Dallas Convention Center. Bringing together more than 25,000 industry-shaping professionals from 90 countries, FMI is the food retail industry's most-attended conference and exposition in North America.

As one of the 1,200+ exhibitors, Hill PHOENIX leads the industry in merchandising flexibility and innovative solutions for retailers' most challenging needs. Visit the Hill PHOENIX booth (#4409) to experience these exciting new merchandising solutions:

* Hill PHOENIX will debut a prototype service case with retractable glass that allows retailers to instantly convert the case to self-service during non-peak hours. The ultimate in merchandising flexibility, this new convertible case is designed to maximize profit potential during all operating hours.

* GMD-5RG Aged Beef Case:

Move your aged beef to center stage with the increased visibility of Hill PHOENIX's new service meat line-up equipped with Clearvoyant™ LEDs to put products in the best light possible.

* CWC-7H/R Hot/Cold Station:

Hill PHOENIX's new Hot/Cold Station runs dry, refrigerated, or hot for the ultimate in merchandising flexibility. Imagine a hot carving station during the week and a refrigerated prep table on weekends.

* CWC-12D Dry Wine Display:

Showcase upscale wine and cheese with a service twist. This unit combines refrigerated wine with a unique wine dispensing service bar. Non-refrigerated wines are showcased in a custom-designed wine rack and bar. This innovative display allows customers to try before they buy. Easily create an upscale department with a small footprint.

* SBI-710H Hot Food Bar with Automatic Timer:

Automatic preheat timers save energy and increase food safety. This new integrated hot entree food bar features a built-in rotisserie merchandiser, auto-fill food warmers and soup wells. A raised product display area with a lower tray slide design makes accessing product even easier.

* Hill PHOENIX's new PureView™ Door System lives up to its name by providing more viewable area in medium temp cases: the largest door height (75 inches), interior height (71 inches) and shelf depth (27 inches) available. More pack-out, product facings, and external viewing area makes it easier for retailers

to stock and customers to shop.

* The next generation of Hill PHOENIX Clearvoyant™ LED Lighting will be on display as part of a one-of-a-kind lighting demonstration featuring various types of LED lighting in combination with different types of ambient lighting. Clearvoyant's proprietary design directs light evenly from angles of 0 or 30 degrees, allowing for multiple merchandising configurations, and optional color temperatures of 3,000K or 3,500K make every product pop.
