The app combined a totally new design with its previous functions: clean up Mac junk files in seconds, show disk space available, warn when the disk space is running low, and eject drives. CleanGenius 3.0 is based on a dark color layout, and has an improved user-interface, such as in “Clean” window, cancel the check boxes to “select places to scan,” which may be confused with those of “select places to clean.”

New features in CleanGenius 3.0:

- * Duplicate finder to find, view and get rid of files with identical content, regardless of name.
- * Disk Usage helps you to spot and remove the unwanted large files in a simple way.
- * Free Memory increases the free memory by a click.
- * Login Item enables you to select the apps to start up during your Mac’s login.
- * Brand-new GUI.

“This App allows you to run the cleaner every time the Mac is started to keep your Mac at its top status! This App also scans my Mac and Drives almost instantly, leaving me easy to view information about each drive. I can easily select what I want to remove and it will remember what I chose for next time,” posted Nathan Lee via the Mac App Store.
