

OxBlue Adds Mobile Site for Android and Blackberry(R)

ATLANTA, Ga., May 9, 2012 (SEND2PRESS NEWSWIRE) – OxBlue, a leader in the [construction camera](#) industry, announced today an expansion of its construction camera interfaces for mobile devices available at <http://m.oxblue.com> .

The mobile application enables users to view high-definition, time-lapse movies of their jobsite right from their handheld device. HD time-lapse movies are automatically regenerated to include the latest images. “The time-lapse movie feature delivers valuable perspective on how a project is evolving,” said Bryan Mattern, Chief Technology Officer for OxBlue.” The movies also make a great marketing and PR tool. With resolution that can go as high as 1024 x 768, it’s a great way to showcase a technological edge to any project.”

The OxBlue mobile application enables users to browse all active and completed projects. They can access both current and historical weather data, and even perform a digital pan, tilt and zoom on high-resolution digital images. A calendar control enables any image to be accessed from any time during the project.

The mobile interface adds to OxBlue’s expansive line of software that supports users of its [construction camera](#) systems, including:

- * Online Interface Access – Available for a desktop or laptop, this interface provides a global view across every project. Users can access time-lapse movies, select high-resolution images using an integrated calendar, zoom and pan camera images, review weather information and take advantage of multiple viewing modes to compare jobsite photos.
- * Jobsite Screensaver – Displays a live feed from each construction project without the need to visit a website.
- * Digital Signage System – Live high-definition images for dynamic display on large format screens.
- * Integration Tools – Enhance corporate websites, internal applications or collaborative management applications with OxBlue’s integration solutions.
- * Jobsite Updater – Keep track of jobsite progress by scheduling regular delivery of images by email.

“We offer a comprehensive array of options to access, control and get the most from our [construction webcams](#),” stated Chandler McCormack, President of OxBlue. “This latest mobile interface expands our suite of offerings to provide clients a full array of options to remotely monitor their jobsite progress.
