

e2b calibration Implements Anytime Assets

CHARDON, Ohio, May 10, 2012 (SEND2PRESS NEWSWIRE) – e2b calibration, a division of e2b teknologies, announced today that they have implemented Anytime Assets into their internal calibration system, allowing customers to track their calibrated assets. Anytime Assets is a cloud-based inventory tracking software that enables users to remotely track their calibrated assets from any location with internet access.

“What sets e2b calibration’s asset tracking service apart from other tracking services is the availability of inventory photos,” said President of e2b teknologies Lynne Henslee. “Users can even view their transactional history with Anytime Assets, providing a comprehensive audit trail.”

e2b calibration provides a photo directory of all calibrated instruments so that customers can physically “view” their inventory. Additionally, the e2b calibration asset tracking service will notify customers of when they are due for service on individual items, so that their instruments don’t lose dependability.

The Anytime Assets tracking service is provided free to all e2b calibration customers. Customers are given a secure login where they can monitor the progress of all their calibrated items by make, model or serial number. Customers are provided with a complete historical record of their item’s condition, and their certificate of calibration can also be viewed on the Anytime Assets network by anyone with a secure password.

The Anytime Assets tracking system offers unique capabilities such as full photos and appointment notifications. It is just one way that e2b calibration offers simple, affordable and accurate calibration services to their customers.

About e2b calibration:

Located in Northeast Ohio, e2b calibration (a division of [e2b teknologies, inc.](#)) is a calibration laboratory that provides expert instrument and equipment calibration and repair services for a broad range of calibration, test, and measurement instruments.
