

Altavera Extends Mortgage Fulfillment Operations to Ten New States

DENVER, Colo., March 7, 2017 (SEND2PRESS NEWSWIRE) – Altavera Mortgage Services (Altavera), a Computershare company and leading provider of outsourced residential mortgage origination services, today announced that it has received residential mortgage licensing approval in ten new states, bringing to 36 its total number of state licenses. Altavera’s origination services are newly available in Arkansas, Connecticut, Illinois, Iowa, Kansas, Minnesota, Mississippi, Oklahoma, South Carolina and the District of Columbia.

The news follows [Computershare’s acquisition of Altavera in May 2016](#) and [Altavera’s January 2017 announcement](#) that it would expand licensing to several additional states to meet growing demand for its private-label mortgage services. Altavera’s customizable, fully SAFE Act-compliant fulfillment solutions include processing and underwriting of conforming, jumbo and non-Qualified Mortgage loans. The company also specializes in closed-loan file review for a variety of loan types.

For complete and up-to-date information on Altavera’s licensing status, visit <http://altavera.com/licensing/>.

“Federal and state laws are abundantly clear. Third parties involved in residential mortgage loan fulfillment, which includes contract processing and

underwriting, must be licensed to provide those services. At Altavera, we do not take lightly these legal obligations,” said Altavera President Brian Simons, adding that Altavera employs a team of regulatory experts to ensure the company remains compliant.

“When Computershare bought Altavera and Capital Markets Cooperative last May, we emphasized that we would invest in both companies and enable them to build on the success they’d already achieved,” said Nick Oldfield, CEO of Computershare Loan Services, the umbrella brand for all of Computershare’s mortgage servicing businesses. “We’re really pleased to announce this licensing expansion for Altavera and look forward to further expansion of our services throughout 2017.”

Typically, both individual mortgage loan originators (MLOs) and companies that engage in mortgage loan origination, including third-party service providers, must hold a license in each state in which they conduct business. Licensing requirements are intended to help borrowers and other purchasers of mortgage origination services verify that their MLO is qualified to conduct mortgage business and has not been convicted of any civil or criminal wrongdoing.

Lenders can verify the licensing status of their third-party fulfillment vendors by conducting a search of the Nationwide Mortgage Licensing System & Registry (NMLS®) Consumer Access(SM) database at <http://www.nmlsconsumeraccess.org>.
